

INNOVATIVE OPTICAL SOLUTIONS

from DONTech

**Display &
Touch Screen
Enhancements**

**Enhanced Display
Solutions**

For demanding military, medical and industrial display applications, Dontech provides unmatched, vertically integrated, custom display and touch screen solutions including:

- EMI/RFI shielding via conductive transparent coatings and fine conductive grids (MEM100 and plated woven meshes)
- Expanded thermal range via Therma Klear™ transparent heaters
- IR/solar-blocking filtration through reflective coatings
- Night vision compatibility using reflective coatings and absorptive filters
- Contrast enhancement via AR, AG coatings, polarizers and colored filters
- Dontech EDS – custom enhanced display solutions via filter/bezel and touch screen assembly, film laminations, optical bonding, and active/passive LCD enhancements
